Hashing

Hashing

Red-Black Trees

Elementary Graph Algorithms

Bipartite Graphs

Path Compression

```
find (i) {
     if p[i] = i
            return i
     else
           p[i] = find(p[i])
            return p[i]
```

Disjoint Sets: all nodes that are parents of the argument gets assigned the same root node as their parent (representative element) including the argument itself.

Heaps & Heapsort

Disjoint Sets

Minimum Spanning Tree
