## Syntax

```
workflows:
    hel lo- wor ld- wor kflow:
        name: Hello world
workflow
        scr ipts:
              - echo " Hello
World! "
```

## Software versions

```
environment:
    flu tter: stable # Define
the channel or version
    xcode: latest # Define
latest, edge or version
    coc oapods: 1.9.1 # Define
version or channel
    node: 12.14.0 # Define
version or channel
   npm: 6.13.7 # Define channel
or version
   ndk: r21d # Define revision
(e.g. r19c);
# Define it in build.g radle as
well
    java: 1.8 # Define version
    ruby: 2.7.2 # Define version
```

docs: https://docs.codemagic.io/yaml/yaml--getting-started/#environment

## Triggering

`trigge ring`: defines the events for automatic build triggering and watched branches.

## Skip building a specific commit

| | |
|---|---|
| `[skip ci]` | include in commit message |
| `[ci skip]` | include in commit message |

## Trigger on push to any branch

```
triggering:
    events:
       - push
    bra nch _pa tterns:
       - pattern: '*'
```
