Coactive Design - Interdependence

Observability	What is AI doing? What is H's intent?
Predictability	What is AI going to do next? What does H need from AI?
Directability	H gets AI to do what H needs. AI needs for H to provide help.

Coactive Design Method

Identification Process	Output: Description of interdependence relationships + OPD requirements.
Selection & Implementation Process	Output: Mechanism that supports a particular interdependence relationship.
Evaluation of Change Process	Output: Possible solution.

Role alternatives

Team Member Role Alternatives	
Performer	**Supporting Team Members**
I can do it all	My assistance could improve efficiency
I can do it all but my reliability is < 100%	My assistance could improve reliability
I can contribute but need assistance	My assistance is required
I cannot do it	I cannot provide assistance
