

RETRIEVING DATAOBJECTS

many at once: `DataObject::get($callerClass, $filter, $sort, $join, $limit, $containerClass);`

one: `DataObject::get_one($callerClass, $filter, $cache = true, $orderby);`

one using ID: `DataObject::get_by_id($callerClass, $id);`

children: `$this->getDescendantIDList();`

versioned data objects

```
if (Versioned::current_stage() == "Live") {  
    $extension = "_Live";  
}
```
