

### Bold and italic

Italics *\*I will display in italics\**

Bold **\*\*While I will display in bold\*\***

### Unordered lists

Input	Output
-------	--------

<ul>

\* Item 1 <li>Item 1</li>

\* Item 2 <li>Item 2</li>

\* Item 3 <li>Item 3</li>

</ul>

Lists must begin and end with a blank line.  
Unordered lists can begin with an asterisk followed by a space.

### Ordered lists

Input	Output
-------	--------

<ol>

1. Item 1 <li>Item 1</li>

2. Item 2 <li>Item 2</li>

3. Item 3 <li>Item 3</li>

</ol>

Lists must begin and end with a blank line.  
You create numbered lists using a number and a period followed by a space.

### Images and links

Image with alt text ![] am an image's alt text](http://www.example.com/image.png)

Image without alt text 

Link with link text [I am the text to be linked](http://www.example.com)

Link without link text <http://www.example.com>

### Headings

# Heading 1

## Heading 2

### Heading 3

Heading levels are expressed using the hash character (#) followed by a space. You must add blank lines above and below each heading.

### Block quotes

> This is a quote

Quotes are created using the right arrow character (>) and a space, which you add before each line of the quote. The quote must begin and end with a blank line

### Inline code and code blocks

#### Inline code

```
codeIsAwesome ()
```

#### Code block

```
`  
Code blocks  
are great for display  
large amount of code  
that need to maintain whitespace  
and indenting  
`
```

A code block must begin and end with a blank line.

Within the code block itself, you use spaces to indent your lines of code.
