

Physical World Cheat Sheet

by Sushi (aishanya_._) via cheatography.com/172469/cs/45908/

What's Physics?			
Physics is	the subject of studying nature and natural phenomena.		
Branches of Physics:	>Me chanics		
>Waves and Oscill ations	>Heat and Thermo dyn amics		
>El ect rod ynamics	>Pr ope rties of Matter and Fluid Mechanics		
>Optics and Relativity	>Atomic Physics		
>Nu clear Physics	>El ect ronics and Commun ication		
>As tro physics	>Co mputer Science		

Nature of Physical Laws

i) Conservation of Mechanical Energy: For motion due to external force, the mechanical energy is constant. ii) Conservation of Total Energy of an Isolated System: If some of the forces are non-conservative, the mechanical energy is tranformed into other forms. iii) Conservation of Mass Plus Energy: the total (mass+energy) of the universe is conserved.

The Fundamental Forces in Nature
