

Create first app

```
rails new name
rails --version
```

Creating a Database Model

```
rails g model Product name:s tring
rails db:migrate
```

Change database to add or remove tables

```
..
```

Console

```
Rails.v ersion
```

```
User.c olu mn_ na      See columns in
mes                   user table
```

```
user = User.new()      Create a user
```

```
user.save              save the user
```

```
user                   To see the details
                        of user
```

```
user = User.c reate()
```

```
User.all
```

```
User.w her e(name: 'name')
```

```
User.o rde r(name: :asc)
```

```
User.f ind(12)
```

```
user.u pda te( name: " BC")
```

```
user.save
```

```
user.d estroy
```

new vs create

new - builds new User, not save to db. You need to call save object

create - Builds a new Product object and immediately saves it to the database (runs validations).
