

Object Creation

There are several ways to create objects in JavaScript. Here are some common methods:

1. Object Literal:

- You can create an object using the literal notation with curly braces {}.

object Literal

```
const person = {  
    name:  
    'John',  
    age: 30,  
    occupation:  
    'Developer'  
};
```
