File operations

ls [<path>]	List files and directories	
	Useful options:	
	-l	*long / wide view*
	-a	*show hidden files and directories*
	-h	*human-readable sizes*
	-R	*show directory content recursively*
	-b	*show escape chars in names*
	-ltr	*reverse sort files by modified date*
	Use --help to show additional options	
touch <file>	create empty file	
cat <file1> [<file2>]	dump contents of file1 to stdout	
	concat file1 & file2 to stdout	
head <file>	dump first 10 lines of file to stdout	
tail <file>	dump last 10 lines of file to stdout	

Directory Operations

cd [dir]	change directory	
mkdir [/dir/path]	make directory	
	-p	*with parent dirs as needed*
