

### Git

```
Création du dépôt : git clone
```

```
Renommer une branche : git branch -m nouveau_nom
```

### Initialisation du git-flow

```
git branch developp          git flow init
```

```
git push -u origin develop
```

### Feature

#### Création

```
git checkout develop      git flow feature start  
                           feature_branch
```

```
git checkout -b  
feature_branch
```

#### Déploiement

```
git checkout develop      git flow feature finish  
                           feature_branch
```

```
git merge  
feature_branch
```

### Release

#### Initialisation

```
git checkout develop      git flow release start  
                           0.1.0
```

```
git checkout -b  
release/0.1.0
```

#### Déploiement

```
git checkout develop      git checkout master  
git merge release/0.1.0  git checkout merge  
                           release/0.1.0
```

```
git flow release finish  
'0.1.0'
```
