No Shuffling needed Encounters Cards

After you finish an encounter, place the card on the bottom of the deck. When you need to check for a new encounter, Roll two d:20 (to get a random result anywhere between 2 and 40). Let's say the total of the two dice added together is 27. You will need to count out 26 cards and place them on the bottom of the deck. Then the top card would be your new encounter.

Party Limits (House rules)

Jimmy's House Rule that limits your party to a maximum of 7 (included your character). This maximum would include hired help, NPC Companions, random NPC's that want to join your party as well as NPC Comrades. The one exception, is that if you are lucky enough to entice 7+ NPC characters to become your NPC comrades, then you should allow it (but this is probably only a pipe dream that will never materialize). Also, if you eventually acquire the skills to lead troops, then they will not be affected in any way by this new House Rule.
