

Compound interest is the process by which your interest accrues interest. It is the reason that investing in appreciating assets can make you rich, and failing to pay off high-interest debts can drive you deeper in debt very quickly.

## Budgeting

Step Determine your goals. What does a life 1: where money is not a concern look like?

Step Determine your income. What is your
2: cash flow each month? Are all of your eggs in one basket?

Step Determine your fixed expenses. These
3: are necessities for you to live each month. Includes: housing, utilities, food, etc. Think any recurring monthly payments.

Step Pay yourself. Set aside 10\%-20\% of 4: your income for you. This is to be used for investing and saving and will be used to purchase income-generating assets.

Step Determine your variable expenses.
5: These are not necessities and include: entertainment, clothing, and other discretionary spending.

Note: As you increase your income and decrease your variable expenses, give yourself a raise. Do not fall into the trap of lifestyle inflation.
