

PROTEINS & PEPTIDES

Recombinant proteins - fastest growing class of pharmaceuticals.

ie. **recombinant human insulin**

-large, complex and unstable

IMMUNOGLOBULINS & MABS

IG- glycoprotein antibodies

Polyclonal serum IgG -passive immunity

mAbs-purified antibodies that bind to single epitope on an antigen.

-from mouse hybridoma cells from

transgenic mice

- to target CANCER cells & AUTOIMMUNE

Dx

- act as antagonist by *binding to antigen* and or by *binding to cell surface markers* on target cells -->**cell death** by

antibody-dependent cell mediated cytotoxicity & complement-dependent cytotoxicity

-umab - human

-ximab- chimeric

-zumab - humanized
