<code>clear-compiled</code>	Remove compiled class file
<code>down</code>	Turn on maintenance mode
<code>env</code>	Display current environment
<code>help</code>	Display help for a command
<code>inspire</code>	Display inspiring quote
<code>list</code>	List commands
<code>migrate</code>	Run database migrations
<code>optimize</code>	Cache bootstrap files
<code>preset</code>	Swap front-end scaffolding
<code>serve</code>	Serve application on PHP dev server
<code>tinker</code>	Interact with your application
<code>up</code>	Turn off maintenance mode

Auth

<code>auth:clear-compiled</code>	Flush expired password reset tokens
----------------------------------	-------------------------------------

Cache

<code>cache:clear</code>	Flush application cache
<code>cache:forget</code>	Remove item from cache
<code>cache:table</code>	Create a migration for the cache table

Clean

<code>clean:events</code>	Cleanup events
---------------------------	----------------

Config

<code>config:cache</code>	create configuration cache
<code>config:clear</code>	clear configuration cache

db

<code>db:seed</code>	Seed the database
<code>db:wipe</code>	Drop all tables, views and types

event

<code>event:cache</code>	cache all events and listeners
<code>event:clear</code>	clear cached events and listeners
<code>event:generate</code>	generate missing events and listeners
<code>event:list</code>	list events and listeners

key

<code>key:generate</code>	Generate and set the application key
---------------------------	--------------------------------------

make

<code>make:channel</code>	New channel class
<code>make:command</code>	New Artisan command
<code>make:controller</code>	New controller class
<code>make:event</code>	New event class
<code>make:exception</code>	New exception class
<code>make:factory</code>	Create a new model factory
<code>make:job</code>	New job class
<code>make:listener</code>	New event listener class
<code>make:mail</code>	New email class
<code>make:middleware</code>	New middleware class
<code>make:migration</code>	New migration file
<code>make:model</code>	New Eloquent model class
<code>make:notification</code>	New notification class
<code>make:observer</code>	New observer class
<code>make:policy</code>	New policy class
<code>make:provider</code>	New service provider class
<code>make:request</code>	New form request class
<code>make:resource</code>	New resource
<code>make:rule</code>	New validation rule
<code>make:seeder</code>	New seeder class
<code>make:test</code>	New test class

Migrate

<code>migrate:fresh</code>	Drop tables and re-run migrations
<code>migrate:install</code>	Create migration repository
<code>migrate:refresh</code>	Rollback and re-run all migrations
<code>migrate:reset</code>	Rollback all migrations
<code>migrate:rollback</code>	Rollback the last migration
