

level of processing Cheat Sheet by azrul via cheatography.com/193206/cs/40194/

The Levels of Processing model

created by Fergus I. M. S. Lockhart in

describes memory recall of stimuli as a Craik and Robert function of the depth of mental processing

1972

being continuously variable

improves long-term

memory.

In a study from 1975

participants were given a list of 60 words.

Each word was presented along with three questions.
