

## Professional Issues in IT Cheat Sheet

by Bayan (Bayan.A) via cheatography.com/122738/cs/31569/

## What is a system?

a set of things working together as parts of a mechanism or an interconnecting network; an assembly of parts or components existing together in an organised way.

a complex whole: for example, the railway system, the human body

a set of principles or procedures according to which something is done

generally have INPUTS, OUTPUTS, PROCESSES, BOUNDARIES

can be made up of many sub-systems

loosely or tightly coupled

outputs from one or more sub-systems can provide inputs to other systems

## What is Information? (cont)

'well-means that the data are clustered formed' together correctly, according to the rules (syntax) that govern the chosen system, code or language being analysed. means that the data must comply 'meaningful' with the meanings (semantics) of the chosen system, code or

language in question.

## What is Information?

Signs/ An action, impulse, event, Signals non-event that can be detected, deduced, derived Data "A description of something that allows it to be recorded, analysed and reorganised."

Inform-Data that has been cleaned, ation processed, stored, organised, transmitted...

Knowledge ...information that has been analysed and interpreted

> ... information that has been refined by experience, education, familiarity...

Wisdom the quality of having experi-

ence, knowledge & good

judgement

σσ is an instance of information, understood as semantic content, if and only if: (GDI.1) σσ consists of one or more data; (GDI.2) the data in  $\sigma\sigma$  are well-formed; (GDI.3) the well-formed data in  $\sigma\sigma$  are meaningful.

'data' defined as 'the stuff of which

information is made'.
