

### Initial Link Guidelines

#### How relevant is this site?

Ensure that the site is relevant to yours

#### What's the quality of the site?

Avoid if the site seems like spam

#### How much traffic does the site have?

Make sure that the site gains sufficient traffic

### Determining Quality of Site

#### When was the Site Created?

The older the site the better

#### What's the Site content like?

Make sure it's grammatically correct

#### Full of Ads?

Avoid if site is choc full of them with little content

#### Bare Essentials in content?

Be wary if little content on site

#### Do they regularly update?

You want sites that regularly update

#### What is the layout like?

Easy to read and easy to find links make it easier for you

#### What's the Page Rank of the site?

Higher PR is better

#### How authoritative is the site?

Use Opensiteexplorer/Ahrefs to determine the authority of the site

### Relevance of Site

#### Is the site in your niche?

Links in your niche are best

#### Would a link from the site bring traffic?

If not, don't use

#### Would you be happy to have a link from them?

You're being advertised on there, so don't use if you're not happy with it

#### Can your business add something to the site?

Gaining links from alternative areas that can bring you relevant traffic

### What to Look for in a Link

*Determining what links are best for your site takes time and requires you to determine the quality of a potential link. Here's some pointers to find out how to decide.*

*Note: The advice given is general, and not specific. Each site should be assessed individually*

### Traffic Statistics

#### How much traffic does the site receive?

Alexa Rankings can be used as a general measure

#### Does the site receive quality traffic?

Check that the rankings are low for your area

#### Can the site be found easily in Search Engines?

Easy to find can mean potentially more traffic to your link

### Social Stats

#### Do they have Social Media integrated in their site?

Having integration means they're more likely to have more followers

#### Do they share their articles?

Ensure they promote any article from their site

#### How many followers do they have?

More followers = more promotion

#### Are they active on all Social Media?

More Social Media gives a better chance of more traffic

### Outbound Links

#### How many links do they have to other sites?

Less is more for your link

#### How many links do they have on a potential page?

Quality of the link is reduced by the number of links on the page

#### How many links do they have to their site?

Like your site, the more the better

#### Where is the link going to be placed?

In the main body of the text has the most value

### What not to do

Use link exchange schemes

Buy links

Post on low quality spam sites

Associate with material you don't want your business to be associated with

Use link wheels - A links to B, B links to C, C links to A

Value of Each Area
