Misc / Diverse

Strg + ⬆ + Alt + P	Show scope in status bar	**
--------------------	--------------------------	----

Plugin Shortcuts

Alignment	Strg + Alt + A
Emmet	Strg + Alt + Enter

Shuffle, Sort, Reverse and Unique Lines

First we have **Shuffle**, which does exactly that, shuffling them into a random order. Then we have **Sort**, which will alphabetize your lines. Next we have **Reverse** which swaps the previously sorted lines, or just flips any code in the reverse order. Finally, we have **Unique** which removes any duplicate lines of code. All of these commands are available via the **Command Palette**.
