

.NET Framework 3.5

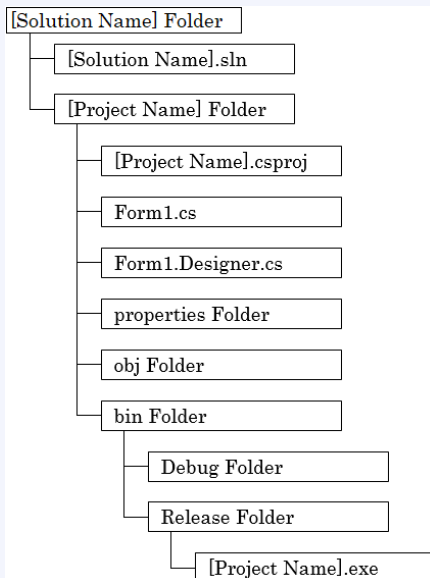

Application Execution

MSIL : Microsoft Intermediate Language

Project Folder, File

Interface oriented

Characteristic : Points that can show characteristics.

Messaging oriented

Characteristic : "Objects" send "messages".

When the "object" receives the "message", it decodes the content and operates.

Prototype oriented

Characteristic : Think of all objects as a "-variable structure made up of general-purpose variables."

Object-orientation

Object	Stuff
Class	Blueprint
Property	Attribute
Method	Motion
Event	Events subject to notification
Instance	Object created from Class

Static Member Instance Member

Static Member No need to instantiate.

Instance Member Need to instantiate.

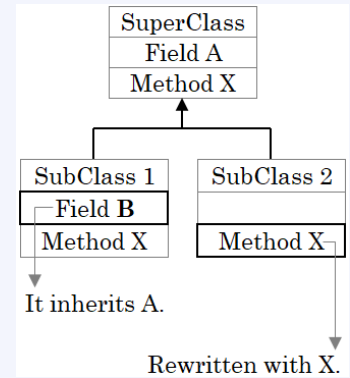

Keyword : New

Class oriented

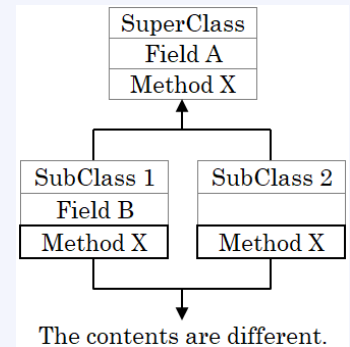

Characteristic : Three elements are required.

Elements : Inheritance, Polymorphism, Encapsulation

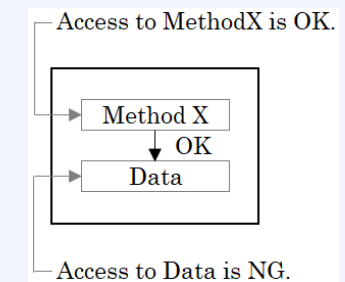

Inheritance

Polymorphism

Encapsulation

Event Handler

Form	Load
Button	Click
TextBOX	TextChanged
CheckBOX	CheckdChanged
RadioButton	CheckdChanged
ListBOX	SelectedIndexChanged
ComboBOX	SelectedIndexChanged

Event Handler - Add

Open PropertyWindow and perform the following steps.

1. Select the target object in the ObjectBOX.
2. Turn on the Event Button.
3. Double-click the Event name.

Event Handler - Delete

1. Right-click the event name in the Property Window.
2. Select [Reset] from the shortcut menu.
