

### Sessions

Start a new session	<b>tmux</b>
Attach to default session	<b>tmux a</b>
List existing sessions	<b>tmux ls</b>
Detach current client	<b>^b d</b>
Detach other clients	<b>^b D</b>
Rename the current session	<b>^b \$</b>

Note: **^b** is the default bind-key **ctrl+b**.

### Windows (tabs)

Create a new window	<b>^b c</b>
Next window	<b>^b n</b>
Previous window	<b>^b p</b>
Select a window interactively	<b>^b w</b>
Rename the current window	<b>^b ,</b>
Kill the current window	<b>^b &amp;</b>

In the status bar (bottom) are the number/name of windows.

### Tmux prompt commands

Enter a tmux command prompt	<b>^b :</b>
Toggle broadcast to all panes	<b>setw synchronize-panes</b>

### Panes (vertical/horizontal splits)

Split current pane vertically	<b>^b %</b>
Split current pane horizontally	<b>^b "</b>
Navigate around panes	<b>^b &lt;arrow keys&gt;</b>
Resize the current pane	<b>^b ^&lt;arrow keys&gt;</b>
Swap pane location	<b>^b ^o</b>
Send the current pane to a new window	<b>^b !</b>
Toggle zoom current pane	<b>^b z</b>
Arrange panes in a tiled layout	<b>^b alt+5</b>
Arrange to a next preset layout	<b>^b &lt;space&gt;</b>
Kill current pane	<b>^b x</b>

There are many other key-bindings for resizing panes that are worth learning, but out of scope for a basic cheatsheet.

### Config file for customization

```
# Shortcut to 'synchronize panes' with '^b ='
bind = set -g synchr oni ze- panes
# Enable mouse support
set -g mouse on
```

Save this configuration in the `~/.tmux.x.conf` file.
