

Jump Operations

Enter	Jump to operand
Alt+Enter	Jump in a new window
Esc	Jump to previous position
Tab	Jump to pseudocode
G	Go to (jump to address)
Ctrl+L	Jump by name
Ctrl+P	Jump to function
Ctrl+S	Jump to segment
Ctrl+G	Jump to segment register
Ctrl+Q	Jump to problem
Ctrl+X	List cross references to
Ctrl+J	List cross references from
X	Jump to xref of operand
Ctrl+E	Jump to entry point
Alt+M	Mark position
Ctrl+M	Jump to marked position

Debugging

F2	Set breakpoint
Green Arrow	Begin Debugger

Subviews

Dissas- sembly	Shows the program in its executable form
Proximity Browser	Flowchart view
Hex dump	Hexidecimal value of the program
Decompile Function	Hexray decompiler plugin. Takes function assembly and spits out pseudocode
Strings	Lists all program strings
Segments	Lists all segments from PE file. If there are a lot debug segments the locations in memory are being dynamically allocated and program is probably packed OR it's loading files off disk and into memory. "Type" section details whether the segment is Code or Data.
Signatures	Displays all relevant code signatures within the program.

Binary Secitonal Graph Key

Light Blue	Library Function
Blue	Regular Function
Rust	Instruction
Grey	Data
Gold	Unexplored
Pink	External Symbol
Green	Lumina Function

This graph is displayed as a multi-colored banner at the top of the window.
