

Creating Migration

```
rails g model [name] [options]
```

```
rails g migration Add[name]To[table]  
[options]
```

```
rails g migration Remove[name]From[table]  
[options]
```

Rake Tasks

```
db:create
```

```
db:migrate [VERSION=#]
```

```
db:migrate:redo [STEP=#]
```

```
db:migrate:up [VERSION=#]
```

```
db:rollback [STEP=#]
```

```
db:reset
```

```
db:drop
```

```
db:seed
```

Supported Types

```
binary
```

```
boolean
```

```
date
```

```
datetime
```

```
decimal
```

```
float
```

```
integer
```

```
primary_key
```

```
string
```

```
text
```

```
time
```

```
timestamp
```

```
You can create your own types not  
supported by rails:  
t.column :name, 'typeHere'
```
