Cyberpsychosis

---

**From the Hare Psychopathy checklist, elements of psychopathy include:**

- Grandiose sense of self
- Need for stimulation
- Cunning and manipulative
- Lack of remorse or guilt
- Callousness and lack of empathy
- Poor behavioral controls
- Impulsivity
- Failure to accept responsibility
- Criminal versatility

This game assumes that if you already have a low EMP, you will be more prone to these symptoms and that the act of cramming unneeded cyberware into your body may trigger this reaction.

**Dissociation  
+ Psychopathic Tendencies =  
Cyberpsychosis**

**or, put another way...**

**"I'm a thing."  
+ "Everyone else is a thing." =  
"Why not just kill anything that gets in  
my way?"**

So outside of a game mechanic, this works out to be:

- You already have low Empathy. Which means you are already prone to dissociative mental problems.
  - You also have an underlying issue with psycho-pathological/schizophrenic illnesses (low EMP to begin with).
-

## Healing Skills

## Critical Injuries

## Repo Cyberware

## Street drugs

## NEEDED SKILLS

There are four healing Skills in **Cyberpunk**  
**Cybertech, First Aid, Paramedic (x2)**  
**Surgery.**

► **CYBERTECH**

- Not capable of Stabilizing Wound States.
- Can be used to Quick Fix and Treat C Injuries done to cyberware that have rep meat parts like cyberlimbs or cybereyes.

## ► FIRST AID

- Capable of Stabilizing Wound States and Fixing only the most common Critical Injury
- Available to all Characters with minimal investment because it is always trained to at least

## ▶ PARAMEDIC [x2]

- Capable of Stabilizing Wound States and Quick Fixing or Treating all but the deadliest Critical Injuries.
- Available to all Characters but is a costly **DEATH SAVING** investment as it is a (x2) cost Skill.

## ► SURGERY

- Capable of Treating even the deadliest Injuries.
- Available only to Medtechs through their Role Ability, Medicine.

## Wound State

**Your Wound State is determined by the amount of Hit Points you have re**

Wound State	Threshold	Wound Effect	Score
Lightly Wounded	Less than 1 HP	None	
Seriously Wounded	Less than 1/2 HP (rounded up)	-2 to all Actions -4 to all Actions	
Mortally Wounded	Less than 1 HP	-4 to MOD (Minimum 1) Next round a <b>Death Save</b> at start of each one of their Turns. Morally Wounded Characters suffer a Critical Injury whenever they are Damaged by a Melee or Ranged Attack. In addition, their <b>Death Save</b> Penalty increases by 1.	DW1 (6)
Dead	One Failed Death Save	Death	1

### ► CRITICAL INJURIES TO THE BODY

Roll (2d6)	Injury	Injury Effect	Quick Fix
2	Disoriented Arm	The Disoriented Arm is gone. You drop any items that the Disoriented arm's hand isreaching. <b>Base Death Save Penalty is increased by 1.</b>	N/A
3	Disoriented Head	The Disoriented Head is gone. You drop any items in the Disoriented hand isreaching. <b>Base Death Save Penalty is increased by 1.</b>	N/A
4	Colleged Leg	-2 to MOVE (any turn) <b>Base Death Save Penalty is increased by 1.</b>	Perseverance 0115
5	Broken Ears	At the end of any turn where you move farther than 40' on foot, you re-callify this Critical Injury's Issues Damage directly to your HP Points.	Perseverance 0112
6	Broken Arm	The Broken Arm cannot be used. You drop any items that arm's hand cannot be used.	Perseverance 0112
7	Foreign Object	At the end of every turn where you move farther than 40' on foot, you re-callify this Critical Injury's Issues Damage directly to your HP Points.	First Aid or Perseverance 0112
8	Broken Leg	-4 to MOVE (any turn)	First Aid or Perseverance 0112
9	Torn Muscle	-2 to Melee Attacks	First Aid or Perseverance 0113
10	Spinal Injury	Next Turn, you cannot use the affected arm, but you can still use a Brawl Action. <b>Base Death Save Penalty is increased by 1.</b>	Perseverance 0115
11	Crooked Fingers	-4 to all Attacks involving the hand	Perseverance 0115
12	Disoriented Leg	The Disoriented Leg is gone. -4 to MOVE (any turn) You cannot dodge attacks. <b>Base Death Save Penalty is increased by 1.</b>	N/A

For list of crits for head, check page 189.

## DEATH SAVES

**At the start of each of your Turns where you are Mortally Wounded, you must make a Death Save.** Roll a d10. If you roll under your BODY, you live, and can take your Turn as usual. **If you roll a 10, you automatically fail your Death Save.** Every time you roll a Death Save, your Death Save Penalty increases by 1, meaning each future Death Save you roll is made with an additional +1, making it progressively harder to stave off death. This Death Save Penalty continues to add up until you are brought back to 1HP by Stabilization, where it resets to your Base Death Save Penalty, which can be increased by the nastiest Critical Injuries.

If you fail even a single Death Save, you die.

## Vehicle Combat

## STRUCTURAL DAMAGE POINTS

**All vehicles have Structural Damage Point: (SDP).** As long as a vehicle has at least one SDP, it can still move. When it has no SDP left, the vehicle is considered Destroyed, is no longer considered covered, and cannot move unless it is repaired with the appropriate Vehicle Tech Skill.

**Vehicles cannot dodge** Attacks like a human, but while in a vehicle you can still dodge anything that you could typically dodge on foot when it's targeted at you instead of the vehicle. Shooting a vehicle with a ranged weapon still requires you to hit your shot using the range table.

## AIMING FOR VEHICLE WEAK POINTS

Every vehicle has weak points: areas which can be aimed for using an Aimed Shot. As an Action you can aim a single shot or Melee Attack

at a vehicle's weak point, taking your whole Action and a -8 to your Check. If successful, you must deal the damage that gets through the vehicle's SP by 2. This is how you aim for the tires, engine, gas cap, etc.

There's no reason not to aim for a weak point with a Melee Attack against a stationary vehicle because vehicles can't dodge and you automatically hit, but if the vehicle is moving, you must beat a DV 13 to hit its weak point and the -8 penalty still applies.

## GETTING YOUR VEHICLE STARTED

Getting into a vehicle is an Action. Getting out of one is not, it's just movement. Starting a vehicle and Stopping a vehicle is an Action. If you have Interface Plugs, part of this Action can include connecting/disconnecting them. **Using Interface Plugs to drive a vehicle means you can drive it without no hands!** Without Interface Plugs, one of your hands must be used for driving and can't be used to do anything else while you are driving. If you take this hand off the wheel, at the start of your next Turn you automatically Lose Control of the Vehicle (SEE PR 1921)

Cyberware reclaimed from codovors has resale value on the market, provided the easily harvested. Only a Medtech is capable of harvesting cyberware (except those easily removable with an Action, like Chipware or Cyberlimbs with Quick Change Modules). A corpse without destroying it in the process (destroyed cyberware has no value on the market, but it could always be repaired with the Cybertech Skill), and the DV to do so is equal to the DV to install the cyberware in a new body. Both procedures take 4 hours, and if failed, destroy the cyberware and waste 2 hours of operating time. If you have no issue destroying the cyberware in the process you can reach for your machete a little faster. Cyberware you pack up for yourself, you might still be repaired before it's of any use. While the installation of any cyberware you purchase is free of its cost, there are many reasons why you may still want to do your own installation. The grid, namely private. Your patient still suffers Humanity Loss from your actions as normal.

**You can't do installation surgery on yourself unless the cyberware's typical installation is Mall.**

Typical Installation	Surgery DV (Medtech only)	Cost to Install Hospital
<b>Mall</b>	DV13	1000eb (Premium)
<b>Clinic</b>	DV15	5000eb (Expensive)
<b>Hospital</b>	DV17	1,0000eb (V. Expensive)

## A temporary Limb

Type	Install	Material	Humanity	surgery
		Cost	loss	DV
standard	clinic	100rb	n/a	DV15
make a Death ref a 10, you know	clinic	0-50rb	4d6	DV17
improv harder to stave stabilization, where res.	hospital	500rb	4d6	DV17

Sometimes when you take cyberparts, you leave the person blind or something. Using body sculpting rules, you can replace these parts, at least temporarily. These procedures take 4 hours, but if they failed, destroy the materials required for the surgery and waste 2 hours of operating time.

Can be used in place of anesthetics; check page 228-229

## epo Job Flow Chart

## The Repo Breakdown
