

Preface

Throughout this guide, the `Alt` will be used to refer to the configured modifier. This is the **Alt** key (Mod1) by default, with **Win** (Mod4) being a popular alternative.

Basics

<code>Alt + Enter</code>	open new terminal
<code>Alt + j</code>	focus left
<code>Alt + k</code>	focus down
<code>Alt + l</code>	focus up
<code>Alt + ;</code>	focus right
<code>Alt + a</code>	focus parent
<code>Alt + Space</code>	toggle focus mode
