

1) Work on your branch

```
git checkout [name]
```

2) Commit to your branch

```
git commit -a -m 'blah blah'
```

3) Checkout (switch to) the master branch

```
git checkout master
```

4) Pull from origin the latest changes

```
git pull
```

5) Checkout your branch

```
git checkout [name]
```

6) Merge Master into your branch

```
git merge master
```

7) Test code to see if everything is working

8) Commit again to your branch

```
git commit -a -m 'blah blah'
```

9) Check if there are updates in master, again

Repeat from step 3 if there are

10) Submit pull request to Master from your branch
