### Cheatography

### CLEP Social Sciences and History Cheat Sheet by deejayy via cheatography.com/110823/cs/21599/

#### **Ancient Civs Mesopotamia**

5500 BCE - 2000 BCE

Along the Tigrus and Euphrades Rivers; fertile crescent

territorial kingdom, Main cities: Uruk, Sumer, Babylon; built on and used slave labor

built Ziggurats (temples) and wrote in cuneiform; over time focus shift from temples to palaces and from gods to people

Around 2000 BCE Mesopotamia declined into a set of city-states

Hammurabi ruled Babylon from 1792 BCE- 1750 BCE; instituted strict laws under Hammurabi's code

Babylon eventually was conquered by the Kassities and then the Assyrians (notably violent)

911 BCE: Neo-Assyrian Empire grew from main cities of Ashur and Nineveh; spread to all of Mesopotamia, E. Coast of Mediterranean and Egypt (680 BCE)

612 BCE: Nineveh conquered and fell

#### **Ancient Civis Egypt**

3000 BCE - 332 BCE

predictable flooding patterns with a calm current; able to use basin irrigation systems; traded timber and gold

#### Ancient Civis Egypt (cont)

2649-2152: Old Kingdom Egypt; pyramids built by slaves and poor (2575-2465 BCE); Ra the sun god worshipped, Pharoahs ruled as demigods; 2 types of writing: Hieroglyphics and demotic

2040-1640: Middle Kingdom; Pharoahs from Nubia, Ammun was god eventually merged with Ra to become Ammun-Ra; Egypt conquered by many during this time including Hyksos (eventually expelled)

1550-1070: New Kingdom; military expansion like empire; expanded with military feats and trade; conflicts with Assyrians, Persians, Romans and Alex the Great

### Economics - Economic **Activities**

Primary Economic Activities

type of operation extracting or refining natural resources; mining, agriculture, forestry, or fishing

Secondary Economic Activities

processing raw materials: timber into furniture, ironore into steel, factories with input and output

### **Economics - Economic Activities (cont)**

Tertiary Economic Activities

service industry or retail sector; tourism. media. clerical services, insurance, banking, law, and health care

marginal utility

used to determine how much of an item consumers are willing to purchase; buying a candy bar to satisfy a sweet tooth and having a second candy bar but not enjoying it as much as the 1st shows decreased marginal utility

total utility the total amount of satisfaction or fullfi-Ilment a consumer gets from consuming a product or service

### Economics - Terminology

supply curve

how products and prices relate to one another in the amount they cost, the amount they are needed (demand) and the amount available (supply)

shift right supply more sellers = more supply, technology that increases production efficiency

curves shift

left in

supply

curves

cost of resources increases = lower supply; expectation of increased prices = temporary decrease in supply to increase demand

where supply and

equilibrium price

demand curves intersect; prices are stable; if 1000 tops are manufactured and sold at 2 dollars and 1000 people are willing to buy at the \$2 price it is the equilibrium price

Along the Nile River, regular and
