

List or Search

```
choco list packageName OR choco search packageName
```

Optional Flags

- all: list all versions of packageName
- pre: list prerelease packages
- verbose: show more information about each package
- source dir: a directory, share, or remote URL feed that the package comes from
- lo: show local packages only

Examples

```
choco list nunit OR choco search nunit`  
choco search nunit -all  
choco search nunit -pre  
choco search nunit -pre -verbose
```

Lists packages available from a remote or local source

Version

```
choco version packageName OR cver packageName
```

packageName

If left empty, checks for an update to Chocolatey, if all checks for updates to all packages

Checks local version against available version
