

xTerm

shift + ins paste clipboard contents to cli window

dpkg (cli of gdebi?)

dpkg -i <package.deb> install package from terminal

Soft Links

```
ln -s {existing-filepath.ext} {shortcut-  
filepath.ext}
```

Think of soft links as {GULP!!!} Windows shortcuts...

Iceweasel

ctrl + [simulate **backward** navigation

ctrl +] simulate **forward** navigation
