Total Commander Button Bar Parameters

?	As the first parameter causes a Dialog box to be displayed before starting the program, containing the following parameters. You can change the parameters before starting the program. You can even prevent the program's execution.
%P	Causes the source path to be inserted into the command line, including a backslash (\) at the end.
%N	Places the filename under the cursor into the command line.
%T	Inserts the current target path. Especially useful for packers.
%M	Places the current filename in the target directory into the command line.
%O	Places the current filename without extension into the command line.
%E	Places the current extension (without leading period) into the command line. *Note: %N and %M insert the long name, while %n and %m insert the DOS alias name (8.3). %P and %T insert the long path name, and %p and %t the short path name. (Same for %o and %e)*
%%	Inserts the percent sign.
%L	Long file names including the complete path, e.g. c:\Program Files\Long name.exe
%l (lowercase L)	Short file names including the complete path, e.g. C:\PROGRA~1\LONGNA-~1.EXE

Total Commander Button Bar Parameters (cor

%F	Long file names without path, e.g. Long na
%f	Short file names without path, e.g. LONGN
%D	Short file names including the complete pa set for accents.
%d	Short file names without path, but using th accents.

These are prettty helpful and took me a while to fi
need them, even if it is one day in the future.
