

## M1340 Is it a Surgical Wound Cheat Sheet

by [deleted] via cheatography.com/2754/cs/15530/

| Yes  | No (cont)  |
|--|--|
| □ A surgical "takedown" or reversal of a previousostomy, which creates a wound □ Orthopedic pin sites· □ Abscess treated with incision and drain only if a drain has been placed· □ Central line sites, Mediport sites, portacath sites, implanted venous access device (even if the implantation site has healed.) □ Device does not need to be functional or accessed. □ Implanted infusion device (even if the device is not presently functional) □ Peritoneal dialysis catheter, AV shunt (even if abandoned) □ Muscle flap, skin advancement flap, or rotational flap to surgically replace a pressure ulcer □ Shave, punch, or excisional biopsy to remove/diagnose lesions | Cardiac catheterization performed via needle puncture (even if stent placed)  PICCs (even if insertion required fluoroscopy)  Implanted pacemakers/internal defibrillators(after original incision has healed)  External infusion device infusing meds SQ  Arthrocentesis, thoracentesis, and paracentesis sites utilized for simple aspiration of fluid  I&D with bone biopsy within a diabetic foot ulcer  Peripheral IVs sutured in place  Pressure ulcer sutured shut  Cataract surgery  Surgery to mucosal membrane  Gynecological surgery via vaginal approach  Skin graft recipient site (unless it already qualifies as a surgical wound on OASIS, such as a grafted pressure ulcer or a grafted burn)  Enterocutaneous fistula  Pressure ulcers treated with surgical debridement  Abscess that has been incised/drained without placement of drain  Surgeries to mucous membranes  VP shunt after original incision heals  Removal or simple excision of toenail |
| <ul> <li>☐ Skin graft donorsite</li> <li>☐ Skin graft applied to a burn or a pressure ulcer</li> <li>☐ Surgical procedure performed via arthroscopy</li> <li>☐ Total surgical excision of pressure ulcer damage</li> <li>☐ Paracentesis site (if drain placed) x</li> <li>☐ I&amp;D with drain placement</li> <li>☐ Wounds with drain placement (even after the drain is removed, the drain opening was created percutaneously or the drain was inserted into a puncture site, such as a stab wound or paracentesis )</li> </ul>   |  |
| ☐ Procedures beyond I&D such as excision of necrotic mass, mesh, or other appliances or structures (beyond simple I&D)   | <ul><li>☐ Needle puncture sites without a drain</li><li>☐ Needle aspiration of fluid without drain placement</li></ul>   |
| ☐ Surgical repair of traumatic injury such as ruptured organs, torn  |  |
| tendons, ligaments, or muscles, and fractures (beyond simple suture of traumatic laceration)   | Credit   |
| □ LVAD exit site   | Source: http://homehealthsolutionsmedia.com/wp-content/uplo-ads/2017/06/oasis-m1340-cheat-sheetpdf   |
| <ul> <li>☐ Incision or "cut down" created to perform procedure per femoral sheath</li> <li>☐ Incision site until healed for pacemaker, internal defribrillator, VP shunt, balloon cathetar</li> <li>☐ Procedure beyond a simple excision of toenail</li> </ul>   |  |
| No   |  |
| □ All ostomies (openings that end in stomy" with or without a drain) □ An ostomy site closing on its own (without surgical reversal) □ Chest tube site with or without a drain/tube □ The surgical line around a fresh ostomy stoma (the peristomal or mucocutaneous suture line) □ Debridement (does not change a burn, pressure ulcer, stasis ulcer, or traumatic wound into a surgical wound) □ Simple I&D of an abscess Simple closure of a traumatic laceration   |  |
| by sutures or stitches   |  |
