

Introduction

During a patient's stay at a facility their doctor and the staff should be working with the patient and caregiver to plan for the discharge. The caregiver, a family member or friend who may be helping, should be important members of the care planning team. Patient and caregiver can use this checklist to prepare for the discharge.

In general, the basics of a discharge plan are:

- Evaluation** of the patient by qualified personnel
- Discussion** with the patient or his representative
- Planning** for homecoming or transfer to another care facility
- Determining** whether caregiver training or other support is needed
- Referrals** to a home care agency and/or appropriate support organizations in the community
- Arranging** for follow-up appointments or tests
