Find duplicate rows for specific columns

```
select column1,
column2, count(*)
anzahl,
        listagg(colu-
mn1,';')
        within group
(order by column1)
litse
from table
group by column1,
column2
order by anzahl desc;
```

Find duplicate rows for specific columns 2

```
SELECT *
FROM (
      SELECT t.*,
ROW_NUMBER() OVER
      (PARTITION BY
column1, column2
      ORDER BY
column1) AS rn
      FROM table t
      )
WHERE rn > 1;
```

listagg

```
LISTAGG (measure_column [,
'delimiter'])
  WITHIN GROUP (order_by_cl-
ause)
```

The **LISTAGG** function concatenates values of the measure_column for each GROUP based on the order_-by_clause.
