

How to Submit Website in Alexa and Verify

Alexa is best and one of the standard website to check ranking and popularity of your website or others blogs. Normally Alexa automatically index your website and add in database and give rating your blog like google but it is better and professional way to submit your website in alexa and claim your ownership. Today we see how to submit a website in alexa and add more details of your website in alexa profile.

Let tell me some about Alexa "What is Alexa Ranking" website. Alexa record your website details like daily visitor, page previews and links etc and give a numerical number which show importance and popularity of your website or blog on internet. For example these days alexa show Google adsense ranking number on top mean 1 and Facebook has at 2nd position worldwide. But remember these ranking number changed day by day according to you website popularity. Now comes to the point and see what are the steps to add website in alexa but first see the points which we are discussed in article.. **Points to discuss:**

How submit website in Alexa

How to verify ownership of website in Alexa

How to add Alexa Widget in WordPress blog

How to submit website to Alexa

Follow me step by step to perform Alexa website submission in order give importance of personal blog and look professional. Let's get started:

1. Go to Alexa.com
2. There is two way to register on Alexa via Email registration and Facebook login you can choose any of them but Email registration is better in point of view. Register is free on alexa.
3. If you signup with email then after entering your email address an activation link will be sent to your email inbox by alexa. Go to inbox and click on link specified in email. Once you open the link given in inbox your alexa account will be activated. Congregates
4. Go to alexa website, sign in, go to account Dashboard and click on Price and planning
5. Scroll down the page and click on "Claim a Site"
