

Merge Folders

```
rsync -avuzP src/ dest/
```

-i itemized format, shows more information

-b backup files that exist in both folders, appending ~ to the old file. You can control this suffix with --suffix .suf

-u skip files which are newer in dest than in src

-z turns on compression

-P turns on --partial and --progress

--partialc keep partially transferred files

--progress shows a progress bar for each transfer

SSH

```
ssh myadmin@10.17.2.6 -p 22
```

Remove empty folders

```
find ./path -type d -empty -exec rm -rf \;
```

Search File by name

```
find ./path -type f -name file.ext
```

AWS Credentials

```
isengardcli assume
```
