

Installing Packages

```
cat(".Rprofile: Setting UK repositoryn")
r = getOption("repos") # hard code the UK
repo for CRAN
r["CRAN"] = "http://cran.uk.r-project.org"
options(repos = r)
rm(r)
install.packages("tree")
library(tree)
```

Counters

```
nrow(x)
ncol(x)
```

createDataPartition

```
#It will distribute evenly the column
Species
train.flag <-
createDataPartition(y=iris$Species,p=0.5,li
st=FALSE)
iris[train.flag,]
iris[-train.flag,]
```
