Customizing Key Bindings

User Settings	All customizations are set in settings.json, as found via the Settings menu. No GUI is available in v1.0.
Defaults	Hold the Alt-key while pressing the Settings menu to open defaults.json. This is useful when building your own setting.json!
Keys	Key bindings are set in the "keybindings" block as: { "command": "cmdName", "keys": "mod+key" }
Actions	Some commands take additional action arguments to modify the behavior.
