

### List of Handy Shortcuts

Goal Seek	Alt A W G	Alt T G
Scenario Manager	Alt A W S	Alt T E
Data Table	Alt A W T	Alt D T

### What is what if Analysis

What-if analysis is the process of changing the values in cells to see how those changes will affect the outcome of formulas on the worksheet.

### What is Goal Seek

Goal Seek helps to find out a desired result in Formula Cell by changing a dependent formula Cell.  
Goal Seek works in Opposite direction of Formula

### What is Scenario Manager

Scenario Manager is an What if Analysis tools which are used to determine different projected Outcomes by changing the formula connected Cells (Formula Dependent Cells).

### What is Data Table

A data table is a range of cells that shows how changing one or two variables in your formulas will affect the results of those formulas.

### What is Solver

Solver changes a group of cells to find an optimum solution to a problem by given conditions.

### Target Cell

Target cell represents objective or goal. We want to either minimize or maximize the target cell. In some situation one can have a multiple Target Cells

### Changing Cells

Changing cells are the spreadsheet cells that we can change or adjust to optimize the target cell.

### Constrains

Constraints are restrictions you place on the changing cells. In Short they are the condition to change the cell. They are not compulsory.
