FEniCS Cheat Sheet

by [fjramireg](#) via [cheatography.com/39194/cs/12215/](https://cheatography.com/fjramireg/cs/12215/)

Linux fundamentals commands

```
sudo -i  
apt-get <...>  
<command> --help [-H]      Options for the  
                           <command>  
                           [help]  
man <command>             Help for  
                           <command>  
export LD_LIBRARY_PATH=/usr/local/lib:$LD_LIBRARY_PATH  Update the  
path
```

Install Anaconda

```
conda info          Verify if conda is installed (check  
                   version number, etc.)  
Download anaconda  https://docs.continuum.io/anaconda/install/  
bash Anaconda 3-4.4.0-Linux-x86_64.sh  Install the downloaded package  
conda update      Update conda to the current  
                   version  
conda update      Update all packages in the  
                   environment to the versions in the  
                   latest release of Anaconda, all of  
                   which are tested for compatibility.  
                   May not contain the newest  
                   versions  
conda update --all  Update the environment  
conda --version    Verify that conda is installed  
conda list         View a list of packages and  
                   versions installed in an  
                   environment  
conda install     Install the conda package  
                   <package-name>  
                   <package-name>
```

Install FEniCS on Ubuntu

```
Download FEniCS options  https://fenicsproject.org/download/  
sudo add-apt-repository ppa:fenics-packages/fenics  
sudo apt-get update  
sudo apt-get install --no-install-recommends fenics  
sudo apt-get dist-upgrade
```

Install dolfin-adjoint on Ubuntu

```
Download dolfin-adjoint options  www.dolfin-adjoint.org  
sudo apt-add-repository ppa:libadjoint/ppa  
sudo apt-get update  
sudo apt-get install python-dolfin-adjoint
```

Install FEniCS on Anaconda

```
conda config --add channels conda-forge  Installing fenics from  
                                         the conda-forge  
                                         channel  
conda create -n fenicsproject -c conda-forge fenics  Create an  
                                         environment  
source activate fenicsproject  Activate the  
                                         environment  
conda install fenics  Install the last stable  
                                         version of FEniCS  
source deactivate fenicsproject  To deactivate this  
                                         environment
```

Install dolfin-adjoint on Conda

```
conda install -c conda-forge dolfin-adjoint
```

Install IpOpt

```
Download Ipopt  http://www.coin-or.org/download/source/Ipopt  
tar xvf Ipopt-3.3.1.tar  Decompress the folder  
cd $IPOPTDIR/ThirdParty/Blas  
.get.Blas  
cd ..//Lapack  
.get.Lapack
```

Install IpOpt (cont)

```
cd ..//ASL  
.get.ASL  
cd ..//Metis  
.get.Metis  
cd ..//Mumps  
.get.Mumps  
cd $IPOPTDIR/  
mkdir build  
cd build  
../configure  
sudo ldconfig  
sudo make  
sudo make test  
sudo make install
```

Install pylpOpt

```
git clone http://github.com/xuy/pyipopt.git  Get the latest  
                                         source code  
python setup.py build  
sudo python setup.py install  
python hs071.py  To see if you have  
                                         Pylpopt ready  
Pylpopt is a python module that allows you to  
use IPOPT in Python Web page
```
