Common Sets	
N	All Natural numbers = {1, 2, 3, 4, ...}
Z	All Integers = {..., −2, −1, 0, 1, 2, ...}
Z^+	All Positive integers = {0, 1, 2, ...}

Common Sets (copy)	
N	All Natural numbers = {1, 2, 3, 4, ...}
Z	All Integers = {..., −2, −1, 0, 1, 2, ...}
Z^+	All Positive integers = {0, 1, 2, ...}

Examples	
$4 \in A$	4 is an element of A
$2 \notin A$	2 is not an element of A

Examples (copy)	
$4 \in A$	4 is an element of A
$2 \notin A$	2 is not an element of A

Examples (copy)	
$4 \in A$	4 is an element of A
$2 \notin A$	2 is not an element of A

Examples (copy) (copy)	
$4 \in A$	4 is an element of A
$2 \notin A$	2 is not an element of A

Examples (copy) (copy) (copy)	
$4 \in A$	4 is an element of A
$2 \notin A$	2 is not an element of A
