ipconfig

ipconfig /displaydns

ipconfig /registerdns

ipconfig /flushdns

Getting Logfiles with xcopy

command xcopy source destination /s

Example xcopy C:\windows\ccm D:\LogFiles /s

Logfile Location

Env.	Part	Location
Windows PE	Before partitioning hard disk	X:\windows\temp\smstslog\
Windows PE	After partitioning and formatting the hard disk	X:\smstslog\ and then C:_SMSTaskSequence\logs\smstslog\ and X:\windows\temp\SMSTSLog
Windows	After windows is setup and before the sccm agent is installed	C:_SMSTaskSequence\logs\smstslog\
Windows	After installation of the sccm agent	C:\windows\ccm\logs\smstslog\
Windows	After the task sequence is correctly finished	C:\windows\ccm\logs\

diskpart - check your drives

open console and start diskpart by typing:	diskpart
list all volumes	list vol
select a specific volume	sel vol <i>NUMBER</i>
list all partitions of a volume	list partition
select a specific partition	sel partition <i>NUMBER</i>
