str * integer → new_str

`"Ho! " * 3`	`#=>`	`"Ho! Ho! Ho! "`
`"Ho! " * 0`	`#=>`	`""`

Copy — Returns a new String containing integer copies of the receiver. integer must be greater than or equal to 0.

str + other_str → new_str

`"Hello from " + self.to_s`	`#=>`	`"Hello from main"`

Concatenation—Returns a new String containing other_str concatenated to str.

str << obj → str / str << integer → str

`a = "hello "`		
`a << "wor-ld"`	`#=>`	`"hello world"`
`a << 33`	`#=>`	`"hello world!"`

Appends the given object to str. If the object is an Integer, it is considered a codepoint and converted to a character before being appended.
