Update box update --system

View all configuration cfconfig show

Export config from a server cfconfig export myConfig.json

Import config to a server cfconfig import myConfig.json

Set a configuration setting cfconfig set adminPassword=commandbox

Ngrok

Description Ngrok is a service that will proxy a locally-running server to the Internet where any coworker, friend, or client with a browser can view the local site you have running. Use this to demo a new site or ask a friend to look at an error for you. This is also great for testing integration with 3rd party systems (like Stripe webhooks) while still developing on localhost!

Documentation <https://forgebox.io/view/box-ngrok>

Install box install box-ngrok

Ngrok (cont)

Start a share	server share start
Stop a share	server share stop
Start sharing - server already running	share
Stop sharing - server already running	share stop
