ColdBox Template Descriptions	https://coldbox.ortusbooks.com/getting-started/installation

Misc

CommandBox Properties File (must be in same directory as exe)	commandbox.properties
Specify CommandBox Home	commandbox_home=Z:\C-commandBox\CommandBox-Files
Play Snake	snake
CommandBox Bullet Train	install commandbox-bullet-train

CFConfig

Description	This is a CommandBox module that provides a CLI for reading, writing, and storing configuration for all CF engines.
URL	https://forgebox.io/view/commandbox-cfconfig
Install	box install commandbox-cfconfig
Update	box update --system
View all configuration	cfconfig show
Export config from a server	cfconfig export myConfig.json
Import config to a server	cfconfig import myConfig.json
Set a configuration setting	cfconfig set adminPassword=commandbox

Ngrok

Description	Ngrok is a service that will proxy a locally-running server to the Internet where any coworker, friend, or client with a browser can view the local site you have running. Use this to demo a new site or ask a friend to look at an error for you. This is also great for testing integration with 3rd party systems (like Stripe webhooks) while still developing on localhost!
Documentation	https://forgebox.io/view/box-ngrok
Install	box install box-ngrok

Ngrok (cont)

Start a share	server share start
Stop a share	server share stop
Start sharing - server already running	share
Stop sharing - server already running	share stop
