

Functions

<code>str()</code>	converts a value to a string
<code>int()</code>	converts a value to an integer

Sample Code

```
mystr = "hello123" # a string is just a list
of characters
numbers = [1,2,3,4,5,6]
print (numbers)
largelist = range(100)
for num in largelist:
    print(num)
```

C
