

### Show Commands

<b>alishow</b>	Displays alias information
<b>zoneshow</b>	Displays zone information
<b>cfgshow</b>	Displays zone configuration information
<b>cfgactvshow</b>	Displays active zone configuration
<b>portshow</b>	Displays status and configuration parameters for ports and GbE ports
<b>switchshow</b>	Displays switch and port status
<b>configshow</b>	Displays system configuration settings
<b>firmwareshow</b>	Displays firmware version

### Create Commands

<b>alcreate</b>	"aliName", "member[; member...]"
<b>zonecreate</b>	"zoneName", "member[;member...]"
<b>cfgcreate</b>	"cfgName", "member[; member...]"

### Add Commands

<b>aliadd</b>	"aliName", "member[; member...]"
<b>zoneadd</b>	"zoneName", "member[;member...]"
<b>cfgadd</b>	"cfgName", "member[; member...]"

### Other

<b>fastboot</b>	reboots without POSTing
<b>reboot</b>	full reboot
<b>h</b>	command history
<b>uptime</b>	time since last reboot
<b>logout</b>	logs you out of the ssh session

### Remove Commands

<b>aliremove</b>	"aliName", "member[; member...]"
<b>zoneremove</b>	"zoneName", "member[;member...]"
<b>cfgremove</b>	"cfgName", "member[; member...]"

### Delete Commands

<b>alidelete</b>	"aliname"
<b>zoneddelete</b>	"zonename"
<b>cfgdelete</b>	"cfgname"

### Updating zone config

After making changes to a config, you need to save the config and then enable it.

<b>cfgsave</b>	
<b>cfgenable</b>	"cfgName"

### Update firmware

Download new firmware version and place on FTP or SSH server. Type **firmwaredownload** for interactive prompts. Updates standby partition only. Automatically runs **firmwarecommit** after reboot. Standby and primary partitions switch. New firmware is now on primary and old is on secondary. If there are no problems, the new primary is copied to the old standby and now both are updated.
