

Objects

Getting the value `student.firstName`
`student["firstName"]`

Setting the value `student.isSmart = true`

Calling an object method `student.fullName()`

Delete `delete object[key]`

Reassign Property Value `object["property"] = "new value"`

Math

Odd Number

```
if (num % 2 == 1) {  
  return true;  
}
```

Even Number

```
if (num % 2 == 0) {  
  return true;  
}
```

Functions

Arrays

substring() `str.substring(indexStart, indexEnd)`

```
const test = 'ABCDEFGF' / test.substring(2,4) -> 'CD'
```

slice() `str.slice(beginIndex, endIndex)`

charAt() `str.charAt(index)`

```
const test = 'ABCD';  
const index = 0;  
console.log( " Index ${index} is ${test.charAt(index)} ");  
// expected output: " Index 0 is A"
```
