

Container Runtimes	
Command	Purpose
<code>docker version</code>	Docker version
<code>docker info</code>	Runtime information
<code>docker ps</code>	Running containers
<code>docker images</code>	List images
Replace <code>docker</code> with <code>podman</code> if working with <code>podman</code>	

Volume Operations	
Command	Purpose
<code>docker volume create</code>	Create volume
<code>docker volume ls</code>	List volumes
<code>docker volume inspect</code>	Volume information
<code>docker volume rm</code>	Remove volume
Replace <code>docker</code> with <code>podman</code>	

Image Operations	
Command	Purpose
<code>docker pull</code>	Download image
<code>docker images</code>	List images
<code>docker search</code>	Search registry
<code>docker tag</code>	Tag image
<code>docker rmi</code>	Remove image
<code>docker inspect</code>	Image information
Replace <code>docker</code> with <code>podman</code>	

Container Networks	
Command	Purpose
<code>docker network ls</code>	List networks
<code>docker network create</code>	Create network
<code>docker network inspect</code>	Inspect network
<code>docker network connect</code>	Connect container
<code>docker network disconnect</code>	Disconnect container
<code>docker network rm</code>	Remove network
Replace <code>docker</code> with <code>podman</code>	

Container Operations	
Command	Purpose
<code>docker run</code>	Create & start container
<code>docker start</code>	Start container
<code>docker stop</code>	Stop container
<code>docker restart</code>	Restart container
<code>docker pause</code>	Pause container
<code>docker unpause</code>	Resume container
<code>docker exec</code>	Execute command inside container
<code>docker logs</code>	View logs
<code>docker inspect</code>	View container details
<code>docker rm</code>	Remove container
Replace <code>docker</code> with <code>podman</code>
