

### Starting Objection

Start objection <b>attaching</b> to a given <b>patched app</b> (For non-Jailbroken devices)	<code>objection explore</code>
Start objection <b>attaching</b> to a given app	<code>objection -g &lt;appName&gt; explore</code>
<b>Spawn</b> an app	<code>objection -g &lt;Bundle_ID&gt; explore</code>
<b>Spawn</b> an app with early instrumentation disabling ssl pinning	<code>objection -g &lt;bundle_ID&gt; explore --startup-command 'ios sslpinning disable'</code>

### Recon

List Classes	<code>ios hooking list classes</code>
List Methods from a given class	<code>ios hooking list class_methods &lt;class_name&gt;</code>
List Bundles	<code>ios bundles list_bundles</code>
List Frameworks	<code>ios bundles list_frameworks</code>
List loaded modules	<code>memory list modules</code>
List exports from a specific loaded module	<code>memory list exports &lt;module_name&gt;</code>
Searching for classes	<code>ios hooking search classes &lt;search_term&gt;</code>
Searching for methods	<code>ios hooking search methods &lt;search_term&gt;</code>

### Tracing

Tracing all methods of a class	<code>ios hooking watch class &lt;class_name&gt;</code>
Tracing a specific method	<code>ios hooking watch method "[&lt;class_name&gt; &lt;method_name&gt;]" --dump-args --dump-return --dump-backtrace</code>
Generating simple frida hooks	<code>ios hooking generate simple &lt;class_name&gt;</code>
Change return value of a method <b>(Boolean only)</b>	<code>ios hooking set return_value "[&lt;class_name&gt; &lt;method_name&gt;]" false</code>

### File Management

Print a file's content	<code>file cat &lt;filename&gt;</code>
Print a plist file	<code>ios plist cat &lt;filename&gt;</code>
Download a file	<code>file download &lt;filename&gt; &lt;destination&gt;</code>
Upload a file	<code>file upload &lt;filename&gt; &lt;destination&gt;</code>
Start HTTP file server	<code>ios http start</code>
Stop HTTP file server	<code>ios http stop</code>

### Misc

List app's paths	<code>env</code>
Monitor the pasteboard	<code>ios pasteboard monitor</code>
Dump Keychain	<code>ios keychain dump</code>
Disable jailbreak detection	<code>ios jailbreak disable</code>
Disable SSL Pinning	<code>ios sslpinning disable</code>
Get app's shared cookies	<code>ios cookies get</code>
