

Core Specs & Style Guide

Base Model	Wan 3.0 video generation engine
Aspect Ratio	9:16 vertical ratio (TikTok / Reels)
Visual Style	Monochromatic COLORS show orange booth
Key Props	Single hanging condenser mic
Motion Style	Rhythmic head nodding & rap groove
Resolution	720p / 1080p MP4 (6s or 15s)

Step-by-Step Meme Workflow

1. Prep Source Image:
Upload a clear, front-facing portrait (person, pet, or avatar). Wan 3.0 guarantees portrait-to-video consistency.
2. Select Output Mode:
Choose 6s for short viral memes or 15s for full verse rap covers (720p/1080p).
3. One-Click Render:
The AI automatically builds the orange studio, places the hanging mic, and syncs hip-hop head nods.

Tool Comparison & Solution

- * CapCut Templates: Fast, but faces warp and motion is stiff.
- * Manual Prompting (Kling/Sora): High quality, but mics melt/deform and camera rarely locks 9:16 angle.
- * Best One-Click Solution: Use the dedicated Hotel Lobby AI video generator for automated orange-booth rap generation without prompt hassle.
